## Project Progress Report

Date: 8/14/19

Project Title: Horton Creek Drainage Improvements

Client Name: City of Rainbow City

Client Contact: Terry John Calhoun, Mayor

### Recent Project Progress

- I had a conference call with Alabama EMA and FEMA on August 1 to discuss where the project was and what additional information that FEMA needed.
- FEMA is asking for a new BCA because they wanted the BCA to be on the long form and not on the short form. They also wanted more documentation of the past damages.
- AEMA kept notes of the information requested by FEMA and emailed me the list late last week. The list is as follows:
  - The BCA needs to be redone on the long form.
  - BCA damages before the mitigation the amount \$185,000 needs to have documentation to back it up.
  - Floodplain letter needs to be in compliance with the floodplain ordinance for the area.
  - Increase water levelà reference HEC-RAS stream analysis.
  - Need culvert replacements in the SOW. Culvert size what it is currently and what it will be. Need headwalls also in the SOW.
  - List depth of ground disturbance and how many in SOW.
  - TOPO map.
  - Conditional map letter of revisions.
  - Has a public notice been completed? If so please include what has been done, pictures, etc.
  - What is the total acreage that's affected?
  - Tree info needs to be included in the SOW.
  - Ground disturbances also put in SOW. Destruction of abandoned bridge, debris being removed and where its going to be put.
- The SOW refers to the Scope of Work

### Planned Project Progress

--

- Provide FEMA with the requested information as listed above.
- Schedule a Public Hearing.

**Items Waiting From Client**

- None

**Items Waiting From CDG**

- None
